Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users.

Phases High-level steps your user needs to accomplish from start to finish	Compare	Decide	Login	Use
Steps Detailed actions your user has to perform	<div>Ask frds for suggestion</div> <div>Checking existing app</div>	<div>Decide to use the application</div>	<div>Try the application and fill details about medicine</div>	<div>Alert user by voice commands at correct time</div>
Feelings What your user might be thinking and feeling at the moment	<div>Excited to know the working of the new system</div> <div>Suspicious about the application</div>	<div>Bothering about consuming medicine</div> <div>Coming across bad reviews</div>	<div>Feeling comfortable about medication</div> <div>Medicine was not refilled</div>	<div>My health under my control</div> <div>Lowering down of change on device</div>
Pain points Problems your user runs into	<div>Suspicious about the application</div>	<div>Confused and unsure about medicine</div>	<div>Thinking about failure</div>	<div>Need some knowledge to use it</div>
Opportunities Potential improvements or enhancements to the experience	<div>Explore various help given by the application to the user</div>	<div>Get help given by application to the user</div>	<div>Giving feedback</div>	<div>Better way to organize multiple pills</div>

TIP
Click on the star to add the tip for your user journey. Add as many tips as you want.
